

Performance

People | Performance

Drive your own success story.

Our performance management process is a continuous, value-driven process designed to support your success and ensure that employee activities and outputs align with the organisation's goals. This falls into four components:

Goal Setting

Define clear, measurable objectives (use SMART method).

This provides direction, clarity on expectations and a path for achievement.

Coaching + Feedback

Have regular ongoing discussions about your performance, strengths and areas for improvement.

Helps you course-correct, learn new skills and feel valued.

Development

Identify skills, knowledge, and experiences needed for growth.

Creates a roadmap for your career advancement within the company.

Review and Recognition

Formal assessment of performance on a quarterly basis. This will culminate in an end of year discussion.

Connects your contributions to compensation, promotion and future goals.
