

Our Impact Scoring

To support meaningful conversations about performance, development, and growth, we use an Impact Scoring approach each quarter.

This helps us recognise not only what you deliver, but also how you deliver it, reflecting both results and behaviours.

Your quarterly impact score provides a simple, consistent way to understand your progress, celebrate achievements, and identify areas for development.

We use four clear descriptors to reflect your overall impact for the quarter:

Needs Improvement

You may be developing in your role or facing challenges that have impacted delivery. Support and guidance will be provided to help you improve and get back on track.

Achieves

You consistently meet expectations, delivering quality work and demonstrating the behaviours aligned to your role.

Exceeds

You deliver above expectations, making a strong contribution through high-quality work and proactive behaviours.

Outstanding

You consistently operate at an exceptional level, delivering significant value and demonstrating standout behaviours that make a notable impact across the business.

■ Development

The Impact Scoring process serves as more than just a performance assessment; it is a critical opportunity for you to understand your career growth and future potential pathways. This discussion will help identify relevant learning opportunities available, which you can further explore using the key tools and resources.
